

Test your water, know your springs.

Over the next 12 months, DCQ can test your spring or bore water at no cost.

DCQ will collect samples from your property, analyse them, and produce a detailed water quality report. Our goal is to assist in understanding Great Artesian Basin and spring recovery, and to help *you* know what is in the water your stock are drinking.

If your property is within the Desert Channels region, contact us via (07) 4658 0600 or info@dcq.org.au.

Note: This is a one-off initiative and limits may apply.
